### PROFESSIONAL SUMMARY

Analytical B.Tech CSE student (7.4 CGPA) with a strong foundation in Object-Oriented Programming, **Data Structures and Algorithms** using **Java**. Proven ability to translate complex logic into scalable products, backed by hands-on experience in **full-stack** development using the **MERN** stack and **Gen-AI** APIs. Passionate about writing optimized, production-ready code and architecting end-to-end software solutions.

### EDUCATION

B. Tech CSE Ganga Institute of Technology & Management (Jhajjar) 2024 – 2028, First Year  
CGPA: 7.4

Class XII, Govt. Sarvodaya Bal Vidyalaya, CBSE 2024 – Percentage: 63%

Class X, Govt. Boys Sr. Sec. School, CBSE 2022 – Percentage: 60%

### TECHNICAL SKILLS

- **Core Fundamentals:** Data Structures and Algorithms (OOP)
- **Programming Languages:** Java, JavaScript
- **Developer Tools:** Git, GitHub, VS Code, Cursor AI, Antigravity, Postman, Docker, Cloudinary
- **Frontend Technologies:** HTML5, CSS3, React.js, Tailwind CSS
- **Backend Technologies:** Node.js, Express.js, REST APIs
- **AI & Cloud Concepts:** Prompt Engineering, Generative AI

### INTERNSHIP EXPERIENCE

May 2026 – Aug 2026

#### Full Stack Developer Intern UptoSkills & Intern Infobyte (May 2026 – July 2026)

**Developed 4** responsive utility applications (Movie, Weather, Todo, Restaurant), integrating **2+** RESTful **APIs** and optimizing frontend rendering to achieve a **20%** faster cross-device load time. **Streamlined** backend operations by developing RESTful **CRUD** APIs and MongoDB indexing, reducing data retrieval latency by **35%** across 1,000+ test records.

June 2026 – July 2026

#### Generative AI & Cloud Computing Intern, IBM Skillbuild x BharatCares

**Collaborated** within a **4-member** agile virtual team across **6-week** sprints, resolving architectural bottlenecks to deliver **1** fully functional prototype ahead of schedule.

### FEATURED PROJECTS

- **Student Tech Portal & Recruitment System (Core Java + OOP)**  
**Engineered** a robust recruitment application utilizing core Object-Oriented Programming principles (**Encapsulation, Inheritance, Polymorphism, Abstraction**) to build a scalable backend architecture.  
**Designed** secure, role-based access modules for students and recruiters, streamlining the authentication process and centralizing application management workflows.
- **Placement Hub (MERN + Gemini API)**  
**Architected** an end-to-end placement preparation platform using the MERN stack, integrating the Gemini API to provide personalized career guidance and interview prep.  
**Constructed** a secure student dashboard with comprehensive tracking for coding practice and automated resume generation, centralizing the placement workflow.
- **Medical Report Analyzer**  
**Created** a smart healthcare diagnostic tool that extracts text from medical reports via OCR and processes it through the Gemini API to generate simplified health summaries.  
**Designed** an analytical dashboard that highlights critical medical risk indicators and actionable recommendations, enhancing patient understanding of complex clinical data.

### Achievements & Certifications

- **Capture The Flag (CTF) / Hackathon Certification:** Successfully competed in and completed the Hack or Crack 2.0 competition, solving complex algorithmic and security challenges.
- **Tech4Hack Hackathon (Thoughtworks Technologies):** Collaborated with a team to brainstorm, build, and present a functional "Resume Analyzer (AI Career Accelerator)" application during the Tech4Hack competition hosted by Thoughtworks.
