PROFESSIONAL SUMMARY

Analytical and results-oriented B.TECH CSE student targeting software engineering roles, with a strong focus on complex problem-solving and FULL-STACK architecture. Proficient in designing and deploying end-to-end web applications using java and the MERN STACK. My professional journey includes hands-on industry internships where i architected secure authentication frameworks, streamlined restful APIS, and integrated generative ai tools to enhance user experiences. I thrive in challenging environments that require a logical approach to coding and a commitment to building scalable, efficient, and production-ready software solutions.

EDUCATION

B.TECH CSE Ganga Institute Of Technology & Management (Jhajjar) 2024 – 2028, First Year
CGPA: 7.4
Class XII, Govt. Sarvodaya Bal Vidyalaya, CBSE 2024 – Percentage: 67%
Class X, Govt. Boys Sr. Sec School, CBSE 2022 – Percentage: 60%

TECHNICAL SKILLS

Programming Language: Java, JavaScript
Backend Technologies: Node.js Express.js, REST APIs
Developer Tools: Git, GitHub, VS Code, Cursor AI, Antigravity, Postman, Docker, Cloudinary

Frontend Technologies: HTML5, CSS3, React.js, Tailwind CSS
AI & Cloud Concepts: Prompt Engineering, Generative AI

INTERNSHIP EXPERIENCE

May 2026 – Aug 2026

Full Stack Developer Intern UptoSkills & Intern Infobyte (May 2026 – July 2026)
Developed multiple responsive utility applications (Movie Recommendation System, Weather, Todo, Restaurent Management System), integrating third-party APIs and ensuring cross-device compatibility.
Streamlined backend operations by developing efficient CRUD APIs and integrating MongoDB, significantly reducing data retrieval times.

June 2026 – July 2026

Generative Ai & Cloud Computing Intern, IBM Skillbuild x BharatCares
Collaborated within an agile virtual team to brainstorm technical requirements, solve architectural bottlenecks, and deliver functional prototypes.

FEATURED PROJECTS

- Placement Hub (MERN + Gemini API)**
 - Architected** an end-to-end placement preparation platform using the MERN stack, integrating the Gemini API to provide personalized career guidance and interview prep.
 - Engineered** a secure student dashboard with comprehensive tracking for coding practice and automated resume generation, centralizing the placement workflow.
- MERN E-Commerce Platform**
 - Architected** a full-scale, production-ready E-Commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering a seamless shopping experience from product discovery to checkout.
 - Implemented** complex state management using React Context API/Redux to efficiently handle dynamic cart operations, user sessions, and real-time product filtering.
- Medical Report Analyzer**
 - Engineered** a smart healthcare diagnostic tool that extracts text from medical reports via OCR and processes it through the Gemini API to generate simplified health summaries.
 - Designed** an analytical dashboard that highlights critical medical risk indicators and actionable recommendations, enhancing patient understanding of complex clinical data.
- AI Powered Custom Chatbot**
 - Developed** a context-aware, intelligent chatbot utilizing advanced LLM APIs (Gemini) with secure authentication and persistent conversation history.
 - Designed** a highly responsive user interface with Tailwind CSS, ensuring seamless human-computer interaction and optimized API latency for real-time querying.
- Avatar Generator**
 - Built** a robust AI image generation application leveraging the OpenAI API, translating user text prompts into high-quality custom avatars.
 - Streamlined** backend storage solutions by integrating Cloudinary for efficient cloud image hosting, alongside secure user authentication flows.
